

## **FLOW INJECTION ANALYSIS OF FOOD ADDITIVES**

Leo M.L. Nollet & Claudia Ruiz-Capillas (editors)  
CRCPress Boca Raton, Florida, USA (Taylor and Francis Group)

---

### **Table of Contents**

#### **Section 1: Flow Injection Analysis: Theory and Trends**

**Chapter 1.** FIA Origin and Development

**Chapter 2.** Sequential Injection Analysis (SIA)

**Chapter 3.** Miniaturisation and Automation: Nanotechnology

**Chapter 4.** Multicommutated Flow Analysis (MCFIA), Multisyringe Flow Analysis (MSFIA), Multipumping Flow Systems (MPFS)

**Chapter 5.** On-line Sample Processing Methods in Flow Analysis

**Chapter 6.** Combination of FIA and Other Analytical Systems (enzymes, HPLC etc). multi-analyte approaches

**Chapter 7.** Flow Injection Analysis — Recent Developments and Future Trends

#### **Section 2: Preservatives**

**Chapter 8.** Determination of Nitrates and Nitrites (E 249-252)

**Chapter 9.** Determination of Sulphur Dioxide and Sulphites (E 220-228)

**Chapter 10.** Determination of Sorbic Acid and Sorbates (E 200-E203)

**Chapter 11.** Determination of Benzoic Acid and Benzoates (E 211)

**Chapter 12.** Determination of Parabens (E 214-E219)

**Chapter 13.** Determination of Acetic Acid and Acetates (E 260-E263)

**Chapter 14.** Determination of Lactic Acid (E 270)

#### **Section 3: Antioxidants**

##### **Synthetic antioxidants**

**Chapter 15.** Determination of BHT (E-321), BHA (E-320), and TBHQ (E 319)

**Chapter 16.** Determination of Propyl Gallate (E 310) and Octyl Gallate (E 352)

**Chapter 17.** Determination of Phosphoric Acid and Phosphates (E 338-343)

**Chapter 18.** Determination of Lactates (E 325-327)

**Natural antioxidants**

**Chapter 19.** Determination of Tartaric acid (E 334-337)

**Chapter 20.** Determination of Ascorbic Acid (vitamin C) (E 300-304)

**Chapter 21.** Determination of Vitamin E and Similar Compounds (E 306-309)

**Chapter 22.** Determination of Citric Acid and Citrate (E 330-333)

**Chapter 23.** Determination of Phenolic Compounds (Gallic, Caffeic, Ferulic and p-Coumaric Acids)

**Chapter 24.** Determination of Catechol

**Chapter 25.** Determination of Flavonoides

**Chapter 26.** Determination of Glutathione

**Section 4.- Sweeteners**

**Chapter 27.** Determination of Aspartame (E 951-E 962)

**Chapter 28.** Determination of Sorbitol (E 420)

**Chapter 29.-** Determination of Acesulfame-K (E 950), Cyclamate (E 952), and Saccharin (E 954)

**Section 5.- Colorants-Dyes**

**Chapter 30.** Determination of Riboflavin (E 101)

**Chapter 31.** Determination of Quinoline Yellow (E 104) and Sunset Yellow (E110)

**Section 6: Flavour Enhancers**

**Chapter 32.** Determination of Monosodium Glutamate (E 621)

**Chapter 33.** Determination of IMP (*Inosine monophosphate*) and GMP (*Guanosine monophosphate*)

## **Section 7: Antioxidant Capacity, Antimicrobial Effects, and Acidity**

### **Antioxidant Capacity**

**Chapter 34.** Determination of 2,2-diphenyl-1-picrylhydrazyl (DPPH) Method

**Chapter 35.** Ferric Reducing Antioxidant Power (FRAP) Method Adapted to FIA

**Chapter 36.** 2,2-Azino-bis-3-ethylbenzothiazoline-6-sulfonic Acid (ABTS) Method

**Chapter 37.** Antioxidant Effect on Luminol

**Chapter 38.** Determination of Antioxidant Activity by FIA and Microplates

**Chapter 39.** Determination of Antioxidant Activity by FIA and Biosensors

### **Antimicrobial Effects**

**Chapter 40.** Ammonia, Total Volatile Basic Nitrogen, and Trimethylamine

**Chapter 41.** Biogenic Amines

### **Acidity**

**Chapter 42.** Determination of Acidity
