Emerging Technologies in Data Mining and Information Security

Proceedings of IEMIS 2020, Volume 3

Series: Lecture Notes in Networks and Systems

- Presents recent research in the field of data mining and information security
- Discusses the outcomes of IEMIS 2020, held in Kolkata, India
- Serves as a reference resource for researchers and practitioners in academia and industry

This book features research papers presented at the International Conference on Emerging Technologies in Data Mining and Information Security (IEMIS 2020) held at the University of Engineering & Management, Kolkata, India, during July 2020. The book is organized in three volumes and includes high-quality research work by academicians and industrial experts in the field of computing and communication, including full-length papers, research-in-progress papers, and case studies related to all the areas of data mining, machine learning, Internet of things (IoT), and information security.
