Construction Engineering**

MIAW

The MIAW-Milan International Architecture Workshop is the international intensive programme at the Politecnico di Milano, School of Architecture Urban Planning Construction Engineering, that provides an international design forum for schools, teachers and students, but it is also an informal platform to discuss issues and share ambitions that education implies. Its aim is to stimulate cross-over thinking between researches and practitioners in the design field, involving different scales and encouraging an interdisciplinary approach towards design problems. Each class has an international guest professor of high profile whose activity and interests are related to the different study courses and disciplinary areas characterising our School.
