Mouriz School, Atelier Nuno Lacanda Lopes (CNUL), Paredes, Northern of Portugal, 2010

With a striped and rigorous appearance, the building is set by the sinuous roof, whose movement on the façade creates an illusion of an apparent city skyline. From the building, with a strong longitudinal form, two closed surfaces are highlighted, punctuated by the apparently disorganised repetition of the same window. And so, window frames dance along the side façades creating a vibrant rhythm that contrasts to the open ends, with large windows.
