## 1. Metodologia do CWUR

O CWUR World University Rankings é elaborado pelo Center for World University Rankings, Arábia Saudita.

“The Center for World University Rankings (CWUR) publishes the only global university ranking that measures the quality of education and training of students as well as the prestige of the faculty members and the quality of their research without relying on surveys and university data submissions.

CWUR uses eight objective and robust indicators to rank the world's top 1000 universities:

- 1) **Quality of Education**, measured by the number of a university's alumni who have won major international awards, prizes, and medals relative to the university's size [25%]
- 2) **Alumni Employment**, measured by the number of a university's alumni who have held CEO positions at the world's top companies relative to the university's size [25%]
- 3) **Quality of Faculty**, measured by the number of academics who have won major international awards, prizes, and medals [25%]
- 4) **Publications**, measured by the number of research papers appearing in reputable journals [5%]
- 5) **Influence**, measured by the number of research papers appearing in highly-influential journals [5%]
- 6) **Citations**, measured by the number of highly-cited research papers [5%]
- 7) **Broad Impact**, measured by the university's h-index [5%]
- 8) **Patents**, measured by the number of international patent filings [5%]

Technical Description
